CA-A110-P - CENTAUR Lock Control Module

Product Description

The CA-A110-P has been specifically designed to greatly reduce installation time and simplify the connection of electromagnetic locks when used alone or in conjunction with door strikes.

This CENTAUR lock control module consists of two onboard, heavy-duty 12V relays and two relay activation LED indicators. The relays, which are used to control power to the electromagnetic locks, are toggled by the activation of the controller's lock output terminals.
